

Fan Coil Unit Repairs at 5 Savile Row, Mayfair

Welcome to the 15th edition of the IDWe Ltd Quarterly Newsletter. As we move into summer, it's great to share our latest news and recent projects, including Fan Coil Unit Repairs and BMS Controls. An update on our latest Accreditations, Hot Tapping Services case study and more. Enjoy!

**One of London's
Leading M&E
Contractors**

Ian Wilford,
Managing Director,
IDWe Ltd

We recently completed **fan coil unit repairs** at offices in the prestigious Savile Row, Mayfair, helping prepare the space for new occupants. Our engineers refurbished **12 fan coil units** to improve HVAC performance, increase reliability, and extend the life of the existing equipment.

By restoring the units instead of replacing them, we delivered a **cost-effective** solution that reduced disruption and supported the client's refurbishment programme while creating a comfortable working environment for future tenants.

New Accreditations

Our team has worked hard to achieve additional accreditations recently:

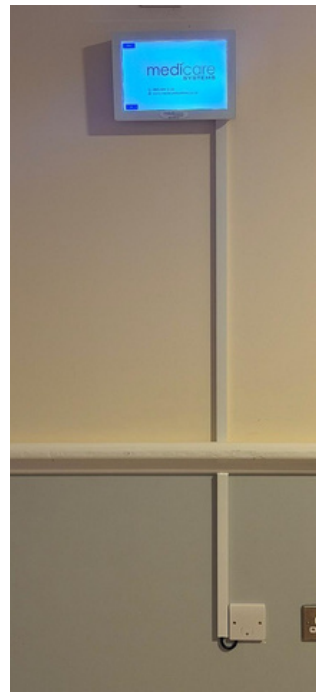

Hot Tapping Services

Our specialist engineers completed Hot Tapping Services for JPMorgan Chase & Co bank at their offices in Bournemouth. Creating live pipe connections while minimising disruption and keeping operations running.

Electrical Services for Care Homes Across London

Our electrical engineers installed new power supplies and socket outlets for Medicare equipment across **11 occupied care homes in London**, giving staff reliable power to support essential patient care without disrupting residents.
